Matt

Yes makes sense to have a new "Event Name" to keep them separate since they are for different purposes.

Raji – we are going to set up a new database for the RI/FS with a new "event name", as described below. I think it makes sense to keep the previous site data (I assume it's mostly removal action waste characterization data) separate from the RI/FS data, since they are collected for different purposes. The datasets can be combined if that makes sense at some point. Does that sound OK?

Raji – our database person has some questions about SCRIBE. Is there someone he can talk to?

Thanks

Matt

Matt

I did some checking regarding your subscription and was able to talk to the SCRIBE personnel at ERT. They said the easiest would be for you use the same subscription as you have for removal. He said just to differentiate you can have a different “Event Name” – if that makes sense.

Please let me know if you have any other questions.

Raji – see old email about the Scribe database, attached. Should we use the same database that is set up for the Removal Actions?

Thanks

Matt

Matt

That is correct – please use EPA’s Scribe database. Here is a link for more info if you need it or don’t have it from before. <http://www.epaosc.org/scribe>

Yes, safety is of utmost importance. We can evaluate the site conditions and touch base next week regarding status of beginning on May 2<sup>nd</sup>.

Raji – early on in the discussions of the RI/FS, we talked about using EPA’s database Scribe. Since we are about to start collecting data, I wanted to see if that was still the case. Please advise.

By the way, there is a lot of rain in the forecast for Houston for the next week and a half, and into the week of the 2<sup>nd</sup> of May. Our drillers are scheduled and we are planning on starting the drilling on the 2<sup>nd</sup>. We will work if it is safe to do so. Regardless, it will very likely be wet and messy out there.

We can catch up on the schedule and outlook for the May 2<sup>nd</sup> week at the Community Meeting on the 28th.

Thanks

Matt
